

THIS PAPER studies the middle
relation, not end-to-end success

witnessed applicability

a directional witness discharges
the load-bearing transport obliga-
tions under the target boundary

retrieved source

a semantic / structural ranker
nominates a recorded
source episode $O_s \xrightarrow{T_s} O'_s$

verified target success

the target problem's own
verification path independently
confirms the composed result

≠

≠

retrieval is not transfer

*eligible experience reuse,
not scientific authority*

*owned by the target's
verification path*

increasing evidential commitment
