

How Paper VI is a capstone. Papers I–III supply the core state, transfer and method-evolution machinery; Paper V supplies the deployed mathematical-research path; Paper IV is an *optional* training-time surface, held behind decision gate #462. The three projections π_{epi} (scientifically licensed), π_{search} (inspect next) and π_{train} (gradient budget) may share canonical identities, lineage and negative history, but *not* authority semantics: training utility $\neq$ search rank $\neq$ scientific authority.
