

Fig 7 – process dashboard

status: CANNOT_MEASURE_AS_PROCESS_TELEMETRY_DASHBOARD

Honest residuals (not imputed):

- status: CANNOT_MEASURE_AS_PROCESS_TELEMETRY_DASHBOARD
- reason: Cycle-metric artifacts list process surfaces but do not satisfy schemas/process-telemetry.schema.json invocation records required by analyze_process_telemetry.py / plot_process_dashboard.py.
- cycle_inventory_rows_with_surfaces: 44
- process_telemetry_dashboard_csv: CANNOT_MEASURE

observational surface mentions (top 12 of 36):

- gap_discovery: 43
- memory: 43
- review: 43
- saturation_stopping: 43
- source_selection_reliability: 37
- equivalence_similarity: 36
- routing: 35
- mathematical_context_translation: 35
- experiment_query_selection: 34
- search_query_generation: 33
- claim_extraction: 31
- contextual_theory_gluing: 28

Observational surface-mention inventory only. Not a Figure-7 process dashboard.
